

SecEd HEADTEACHER UPDATE Children  SEND network 

FREE WEBINAR

Teaching pupils who have mild vision & hearing difficulties

Register today

Thursday 20th June, 2024 4pm - 5pm

In partnership with:  **SchoolScreener[®] For Schools**

SecEd & Headteacher Update have partnered with SchoolScreener for Schools to provide a free webinar offering practical strategies for how teachers and schools can support the education of children with vision and hearing difficulties, including classroom strategies and advice for SEND/inclusion teams.

The **free** webinar will take place online on **Thursday 20th June at 4pm**, so make sure you secure your place.

With 1 in 5 students affected by mild to moderate vision and/or hearing loss, the webinar will offer advice on spotting the signs of undiagnosed problems and tips on working with parents and carers to ensure children are supported.

Don't miss out on the opportunity to ensure the best possible outcomes for all your students.

Can't make the date? Registrants will be able to watch the recorded webinar on demand at a time that suits you.

THE WEBINAR WILL ANSWER KEY QUESTIONS:

- What are the common vision and hearing difficulties that teachers will encounter in the classroom?
- What impact do these conditions have in terms of pupil learning and engagement, behaviour, and on wider issues such as mental health?

- What are the implications for your classroom management and lesson-planning? What can teachers put in place to try and overcome these barriers to learning?
- How can we ensure all staff consider the potential unmet needs of pupils who are displaying challenging behaviours?
- What are the links between vision and hearing problems and other SEN or social emotional and mental health needs?
- What are the particular challenges when identifying vision and hearing problems in pupils using English as an additional language?
- How can schools spot the signs of vision and hearing problems and work with parents/carers to find solutions?
- Why do schools need to take the lead in identifying vision and hearing deficits in their pupils? How can in-school screening programmes support this work?

There will also be an opportunity for audience questions at the end of the webinar.
